

Trust is everything

In difficult and challenging times, trust is the most precious asset people need and are looking for.

The Leader as a source of trust, is a leader who guides and inspires own team members with an open, rationally reassuring and emotionally intelligent dialogue.

Webinar 2 hours

There are four elements that contribute to build trust in everything we do. They are not what we feel or we intend to do. **The people around us only trust us for what we do.**

This is the only thing they know about us. They do not see and do not know our feelings or good intentions. They only see and evaluate our actions.

This introductory Webinar presents the four elements that contribute to create **Trust** and explores how this can be maintained and increased through the times.

Webinar 4 hours

This Webinar delves into the four dimensions presented in the previous one and creates a personal reflection **space** to explore ways and circumstances which contribute to expand or reduce our **Circle of Trust around us**

Webinar 8 hours

This Webinar is designed for Intact working Teams who want to explore and deepen their own ability to **build trust.**

The first part of the program introduces the theoretical elements that lead to the creation of the Circle of Trust and includes the opportunity to the Team to measure own current level of mutual trust and to identify concrete actions to improve it while working together.

This program can be expanded with the organization of a 2 or 4 hours **follow-up Webinar**, aimed at measuring the evolution of Trust within the Team. This includes the possibility to design a customized follow-up program agenda with the program Facilitator to address specific needs and expectations of the Team.
